Mobi Control v7

Manage, Support, Secure & Track Your Mobile Field-Force

Take **Control** of Your Mobile Assets

Enterprises in today's global marketplace are taking advantage of wireless mobile technology to manage their supply-chain and provide real-time business intelligence to key decision makers. The challenge is to effectively manage, support, secure and track evolving mobile field forces across diverse network topologies.

Whether you are using consumer based devices for push email or ruggedized devices in the field, MobiControl is the solution of choice for rapid and reliable performance over any network for any size of deployment.

MobiControl - *The Right Choice!*

- **Most Comprehensive Solution on the Market**
- **Award Winning Technology**
- **Advanced Security Features**
- **Extensible Architecture** (*Ten to tens of thousands of devices*)
- **Most Competitively Priced solution on the market**

### *Download a fully functional evaluation version of MobiControl today!*

"Had it not been for MobiControl, we would never have been able to grow our mobile business to the size it is today. While extremely powerful, it is also a simple and practical tool that has been fundamental to our success."

- Nigel Fawkes, AutoRestore, UK.
Field Support Analyst

"The cost associated with Device Management through SOTI is a fraction of the cost of other solutions, while providing twice the feature set. What a pleasant surprise."

- Ben F. Marshall, KCI, USA.
Chief Architect

MobiControl *Completes the Mobility Puzzle*

Automatically deploy software and data in real-time over any network connection.

Full remote control over any network; manage / view file systems & registry of any device.

AD Integration, File Encryption, Malware Protection, Perimeter Security, Industrial Browser, Phone Black/Whitelist, Device Feature Control and much more!

Perform scheduled or ad-hoc file / data synchronization.

New! Locate and track mobile assets, including geofencing, breadcrumbing, speed and real time location.

New! Set up alert notifications via email or SMS.

Use standard or custom reports to monitor your mobile operations.

Automatically identify problem areas with advanced Diagnostic and Imaging Tools.

Track hardware and software assets; automatically group devices based on location, etc.

Track device repair history to identify problems and defective units.

Fastest Remote Control over any Network!

Mobi Control v7

We Manage Mobility

Maximize your Mobile Field-Force

Reduce Total Cost of Ownership
Automate processes to increase productivity, reduce labor costs, and maximize your ROI

Increase Productivity
Minimized downtime, shortened training curves, increased user adoption, reduced support and labor costs and simplified device management.

Reduce Security Risk
AES-256 full device storage encryption using FIPS 140-2 certified algorithms to protect your sensitive data, Active Directory based user authentication, Application Run Control, Device Lockdown (Kiosk Mode), Hardware Feature Control & much more. Advanced security polices provide administrators with granular control over how mobile devices are used and data is accessed as well as help achieve PCI, SOX and HIPAA compliance.

Benefit from Open Standards
Built using open industry standards with no need for proprietary hardware or software.

Protect Your Investment
MobiControl supports all Windows based mobile and desktop computing devices that operate over any wired or wireless network (e.g. WiFi, GPRS, CDMA, EDGE, UMTS, LTE).

System Requirements
Manage any mobile device or computer running any Microsoft mobile or desktop Operating System.

Compatible with all devices / computers running Microsoft Windows CE, Pocket PC, Windows Mobile, Smartphone, Windows XP, Windows 2000, Windows Vista, and Windows 7 (32-bit or 64-bit) Operating Systems.
